President
Spain Deaf Sports Federation (FEDS)

Dear friends,

As the maximum representative of the Spain Deaf Sports Federation (hereinafter FEDS), and on behalf of all the people who are part of the federation, we welcome you to the European Deaf Feeder & Shot Cup to be held in Seville on 21 – 24th September 2022.

I am convinced of the good success in the organization and for deaf fishers from Europe, so I am looking forward to enjoy in this event, supporting the recognition of the participants and granting the prestige that have the deaf sport from Europe.

Without another issue, and thanks for your attention, receive my best regards

Antonio Jesús de La Rosa del Pino

Dear friends and fishermen of Europe:

We present ourselves as provisional collaborators waiting for European recognition by EDSO (European Deaf Sport Organization). After the last positive experiences (Slovakia, Italy and Poland), we warmly welcome you to the fourth edition of the international competition for the deaf, here in Spain, in the wonderful city of Seville, which will take place from September 21 to 24. of 2022.

The organising committee and the Spanish Federation of Sports for the Deaf (FEDS) are working hard with the European event and it will surely be ready for the great success of the European competition.

We look forward to a large turnout, also to give EDSO credit for the future of our beloved sport of fishing and to be officially European Championship by EDSO itself.

Sincerely

Fernando Solís / Andrea Tiziani / Ivan Lisitsyn / Stefan Bodis / Barbu Adrian / Pallini Pierre

Fernando Solis Llamas
Fishing Committee
Spain Deaf Sports Federation (FEDS)

Dear Friends,

The next month of September, in the city of Seville, will be the European Deaf Feeder & Shot Cup for deaf people in the Feeder & Shot Cup modality.

As part of the Fishing Commission of the Spain Deaf Sports Federation (FEDS), it is a pride for me that this European Deaf Feeder & Cup is held in Sevillian lands and I call on all the athletes of the clubs in Europe to attend this wonderful championship.

Based on my experience of many years helping to organize different competitions and actively participating in sport fishing, I have no doubts that this European Deaf Feeder & Cup will be a success. Sport fishing is experiencing an expansion at national levels thanks to the sport of fishing in the FEDS, and I would love that this expansion also reaches all deaf people fond of fishing throughout the national and international territory, taking this opportunity to get together and enjoy this sport together.

Fernando Solis Llamas

COMPETITION VENUE

We have the plan to make the competition in the place “La Barqueta”, in Seville, but the River “Guadalquivir” collects all kinds of sports, then in the event can coincide with some rowing competition that prevents the normal course of the competition, then we will move to the Blue Lake (“Lago Azul”), also from the province of Seville.

3- Green flag = start of competition.

4- Yellow flag = 5 minutes for the end.

5- Red flag = end of the sleeve.

RULES

The competition will take place at the “La Barqueta” or “Lago Azul”, based on the schedule indicated in the Program.

EVENTS.

The fishing events for all the competitions is free. Each athlete may choose for any of the events or styles of FISHING TO COUP with or without reel.

DRAW.

The draw will be held in the presence of the federation representatives, one day before to competition, it will be made pure.

DEVELOPMENT.

The duration of the sleeve will be FOUR hours of skilful fishing effective. Once the draw has been made and the documentation is presented to the participant, you move to the fishing stage and place all your material inside the assigned fishing post, leaving the same once the introduction of the material.

Allowed:

- a) Receive help in the transportation of the material by other people who at no time may enter the fishing stand
- b) Mix, sift and moisten the mud off the fishing post by third parties.

Not allowed:

- a) Mount the material out of the position or introduce it mounted.
- b) Prepare the engodo in balls outside the fishing post.

When the rules contemplate limitation of baits and sticks, these may not be made balls prior to be supervised by the judges. From one hour before starting the competition, the Judges or Committee may control the amount of bait and engode.

- a) AMOUNT OF ENGODE: 17 liters. The fully mixed paste will be measured when ready for use (moistened, sifted and not caked) including earth, gravel, corn, wheat, hemp seed etc, or any other additive. The glues should be presented to the control in a graduated container (bucket graduate).
- b) The screening of the glue (with sieve, basket, and other utensils) as well as mixing with electric whisk, soak with water or any other liquid (additive type) in one way or another (hand, vaporizer, sponge, container, etc. is prohibited after bait control.

QUANTITY OF BAIT: 3 liters. Baits already formed will be measured by Judges.

ORGANIZATION.

- a) The use of pellets, balls or any other agglomerated product is prohibited for primed and as bait in the hook.
 - b) The competitor will have the obligation to present evidence of the amounts of bait and stock provided for in the Bases. In case of default and subsequent recidivism will be sanctioned with a position in the classification of the sector.
 - c) Larvae for bait (asticots, ver de vase, pinkis, etc ...) must be presented in an official measurement box, without preservatives and without adhesive tape to maintain the lid closed.
 - d) Athletes must be provided with their own bucket and official measurement boxes. In case of default in the first round, you will have the option to submit it in the second, if not, he will be disqualified.
 - e) Any athlete who after the control of baits has in his possession more engodo or bait than allowed in the call will be sanctioned to punctuate him with the positions of the last classified plus one, in case of having proof that he has done it from the first sleeve will be disqualified.
1. Once the **first signal** is heard, "entry to the posts" you can enter the fishing posts and start the preparation of the sports equipment; water survey and measurement, testing or testing of lines and floats. From this moment the athlete will not be able to leave the fishing post during the preparation time.
It also allows the placement of platforms and other elements necessary for the correct use of the material and development in the fishing post; for all this they will have a maximum time of 120 minutes.
 2. **Second signal** "bait and fat control" indicates that there are five minutes left for bait control, this will be done 1 hour and ten minutes before intensive priming.
Once the inspection of baits, fattening and rejón has been carried out, it can already be introduced into the water.
The preparation of baits begins, gluing of asticots and engodo in balls.
 3. At the **third signal**, "intensive priming" ten minutes before the start of the fishing action, participants may begin with intensive priming (banding and priming) as they see fit, within the limits of their posts or the imaginary extension thereof.

Allowed:

The use of the "coup" in the priming being mandatory to unplug and the shooter or catapult (already throughout the competition).

Only the vaporizer without additives is authorized to recondition the baits and fattening.

Not allowed:

Throw engodo or baits with maintenance material (any type of primers, servers, envelopes or any other system or device not expressly authorized). Soak with water or any other additives the greases.

4. The **fourth sign**, "beginning of the competition" .- The competition will begin. From this signal, you can only bait lightly and discreetly (small amounts of bait in balls the size of a nut). By soft priming it is understood to use and manipulate the bait with one hand, without the help of anything else, except for a slingshot handled with both. The use of small containers for soaking the bait in the hook is authorized. From this moment on, it is forbidden to provide any material to athletes except for broken items that can be replaced, and always through the Judge and / or member of the Technical Committee, which may also intervene to assist in the removal of broken items They were stuck together.
It is also forbidden to receive any kind of bait / engodo, except in case of an accident, which bait could be provided only for the hook, prior authorization of the Judge.
5. The **fifth signal** will indicate that there are five minutes left until the end of the game.
6. The **sixth and final signal** will terminate the manga or the competition. Any piece that is not clearly out of the water will not be valid. Athletes will remain in their positions, being able to start collecting sports equipment now.
7. All the **acoustic signals (with flag)** that mark the different stages will be brief; in all cases the start of the signal must be taken as valid.

BEHAVIOR RULES.

Any participant can use the assigned fishing post, as he deems appropriate, without sudden movements, discreetly, passing unnoticed.

Once the last signal is given, whether or not catches have been obtained, the participant will remain in his position, without manipulating the catches until the weighing team takes over the documentation, catch control and conformity signature of the participant.

Not allowed:

- a) Fishing with the lure with lure or fly, or with live or dead fish.
- b) Deep sea fishing with the ballast run or not.
- c) Fishing with artificial baits: imitations of asticot, see vase, worms, corn, etc.
- d) The use of echo probes.

- e) The introduction into the grid of any type of additional weight. Ballasts are authorized outside.

FISHING MATERIAL.

WHITE HAIR. You should only have ONE ROD in fishing action, whatever the type of fishing practiced, and may have, as a reserve, mounted or not, as many as it deems appropriate, and the length of the rods must be adapted to the following standards:

Rod Length

Modality: Male and and Female.

FISHING WITHOUT REEL COUP: Maximum 13.00 m.

REELS: Optional use, either manual or automatic, fixed or rotating coil.

LINES: Free composition and bonding system.

RIG: The authorized fishing equipment must obligatorily carry a float provided with a simple hook (single point with harpoon) attached to a branch or line.

Is prohibited:

- a) The excess of lead (the ballast or lead of the line should therefore not be higher than the one allowed by the float considered).
- b) Fishing with the bottom line, leaded with or without float.
- c) Line bass or bypass mounted ballast.
- d) Teaspoons and artificial flies.

It is allowed:

Although the main plumb line must not rest under any circumstances at the bottom, it is nevertheless allowed to rest up to 10% of the total weight of the plummet.

FLOATS: they will adapt to the following standards:

- English Fishing: Fixing by a single point, fixed or sliding.
- Coup Fishing: Fixing by two points.
- Bolognese fishing: Fixed by two points, fixed or sliding.

PLATFORMS.

Platforms with dimensions of 1 m² are allowed. (1x1), and should be installed in a straight line out of the water. Additional platforms may be installed in line with the main one, just to carry material.

AUXILIARY ELEMENTS.

The handles, catapults, punching or salabre. The participant may use the punch or salabre as an aid for the extraction of the piece of water. The action will be made by the participant, without receiving any help.

BAITS.

The use of natural or organic origin baits is allowed. Baits consisting of dead or live fish, as well as fish roe are prohibited. Baits intended for hook not.

They can be kneaded, but they are punctured.

CAPTURES.

For the purposes of VALID CAPTURES, all fishery species obtained in form and time will be considered. Also, valid catches will be considered:

- a) Those pieces that, once the signal of completion of the manga or Competition are given, are not in contact with the water.
- b) Fish caught by mouth or accidentally out of it.

They will not be considered valid:

- a) Measurement catches less than 8 cms.
- b) Those that have been obtained by unsportsmanlike methods and contrary to what is established by regulation.
- c) Catches to theft (deliberate harpoon of the fish). The bathrobe, sun perch, eel and catfish will not be valid for the competition.

The return will be mandatory, once the weighing control has been carried out, of all live captures to the water. For this, adequate means (grilles) will be available to keep them alive.

The presentation to weigh of invalid catches, empowers the Judge or Judges of the competition to disqualify the pieces and deduct the score that would have corresponded to them if they were considered as valid.

CLASSIFICATIONS.

The score assigned to classify the results will be ONE POINT per GRAM.

An independent classification will be made in each of the zones and phases in which the competition is divided.

The CLASSIFICATION by SECTORS or ZONES, will be established in order of highest to lowest score (weight). In case of a tie to points in the same sector or area, the fishermen affected will have the average of the positions obtained. Fishermen without catches will obtain a number of points equal to the average of positions without catches in the same sector or area. If there is only one fisherman without catches, or if a fisherman is missing in a sector or area, he will have a number of points equal to the last position.

The FINAL CLASSIFICATION GROUPS, will consist of the sum of positions obtained by each participant in the different sleeves of the competition, being classified from minor to greater sum of positions. If there are equal positions between two or more fishermen, it will first be the one that has obtained the highest number of points (weight) in the sum of the sleeves. If the tie persists, it will be first, the fisherman with the highest number of points (weight) in one of the sleeves.

For climatological or organizational reasons, the schedules, scenarios and the duration of the tests may vary. For what is not included in these rules, any decision must comply with the Regulations of Sports Fishing Competitions.

The fishing area should be clean, the opposite case would be grounds for disqualification. JURY and COMPETITION COMMITTEE of Andalusian Federation of Sport Fishing.

REGULATIONS

Hearing Devices: The use of any hearing aid(s)/amplification or external cochlear implant parts is strictly forbidden from the restricted zone area in the competition.

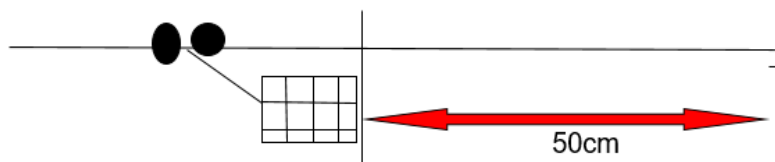

Catches: Are not valid, bathrobes, sun perch, catfish, circle and eel.

Sleeves: The Competition will be held at 1 sleeve of four hours.

Drawings: The draw will be pure.

Rods: A reed rod, with a maximum length of 4.50 m.

Line low: The length of the line low will be mandatory equal to or greater than 50 cm. This measurement will be taken into account from the top point of the primer.

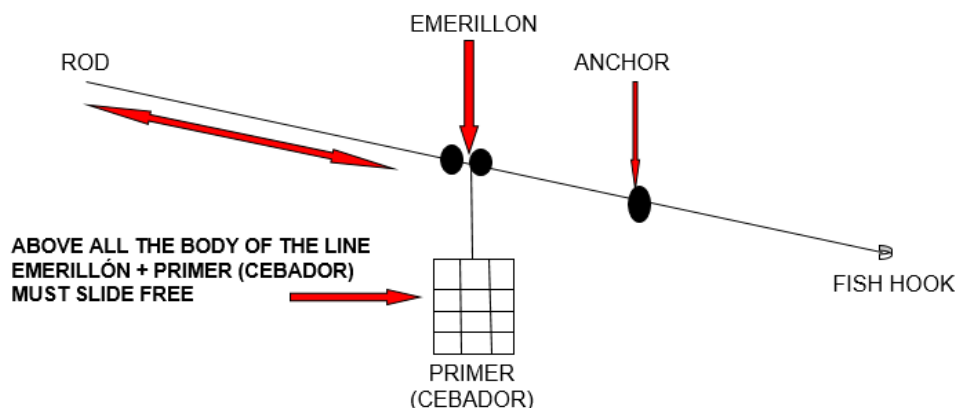

Ballasts / primers: The maximum dimensions of the primers will be 5 centimeters in diameter and 7 in length.

It is only allowed to use cage type primers with or without a lid and can be hung or passed through the inside "inline".

The use of **spring-primers** in which the engodo or bait is pressed on the outside is **PROHIBITED**.

The type of montage must allow the primer to slide freely over the body of the entire line so that in case of breakage it allows the fish to be released. The use of rubber beads or the like above the primer is not allowed as a method of fixation. (See attached montage scheme)

Bait / fattening limitation

Baits: Up to 3 liters are authorized including a maximum ½ liter of ver de vase and / or fouillie.

Are prohibited:

- Baits consisting of live or dead fish and fish roe.
- Artificial baits whatever their composition (rubber, sponges, etc.), imitating asticot, earthworm, vase vers, corn, etc.
- Baits intended for the hook may not be kneaded and adhered to it, but punctured.
- Bread, pasta (kneading materials or baits) boilies, pellets, engodo pellets etc.) are prohibited.

Engodos: Its volume will be inspected: 12 LITERS of engodo ready for use (wet and sieved), including seeds, corn, soil, etc.

Bait control may, if it deems necessary, dump the engodo in another container for inspection.

Scoring / Weight: The nailed piece that invades the area of another fisherman and entangles its gear must be released immediately; Failure to do so and enter the grid, the athlete will be penalized with the loss of the major piece captured.

Prohibited: The use of headphones, talkies and echo-probes by the fisherman.

The consumption of tobacco is prohibited in the course of all competitions, from the entry into the positions until the end of the test, establishing the corresponding sanctions, where appropriate, for those who fail to comply.

ACOUSTIC SIGNALS

1. Once the **first signal** is heard, you can enter the fishing stalls and start the preparation of sports equipment; preparation of baits and fattening and drinking water with a ballast but without a primer or floats. It also allows the placement of the grating, platforms and other elements necessary for the correct use of the material and development in the fishing post; for all this they will have a maximum time of 60 minutes.
2. At the **second signal**, 30 minutes after entering the stalls, the control of baits and fattening starts.
3. The **third signal**, start of the competition with the help of only the primer / feeder. (Any other priming method is prohibited).
4. The **fourth signal** will indicate that there are five minutes left until the end of the manga.
5. The **fifth** and **final signal** will terminate the manga or the competition. Any piece that is not clearly out of the water will not be valid. Athletes will remain in their positions, being able to start collecting sports equipment.

Once the fishing action is over, the athlete, whether or not he has made catches, will remain in his fishing post without manipulating the catches, warning of the arrival of the weighing equipment that is responsible for the documentation and weighing of the pieces; these, after weighing, will be imperatively returned to the participant's grid that will be returned to the water; then the athlete will act as a witness in the weighing of the next participant. Only at the end of the weighing of the Sector, the person responsible for it will give the order to return the fish from the rejón to the water. This way of proceeding will allow the weighing again in case of claim.

INFORMATION

Athletes will take full care of the cleanliness of their fishing post, prohibiting the dumping of any type of garbage or polluting spills into the waters and their surroundings. Before leaving the fishing site at the end of the test, the post must be left without any garbage. Violation of this rule may result in the disqualification of the athlete.
